Technical description

The GW...A4 HP pressure switch is an adjustable pressure switch as per EN 1854 (GW 6000 A4 as per DIN 3398T3) for burners.

It is suitable for closing, opening or switching over a current circuit when the actual pressure value deviates from **the specified pressure setpoint. The specified pressure setpoint (operating point)** is set at a setting wheel using a scale.

Application

Pressure monitoring in burner control systems

Suitable for gases of gas families 1,2,3 and other neutral gaseous media, as **well as air, flue gases and combustion products.**

Approvals

EU type test approval as per EC Gas Appliance Directive:

GW...A4... CE-0085 AO 3220

EU type test approval as per EC Pressure Equipment Directive:

GW...A4... CE0036

Approvals in other important gas-consuming countries.

Functional

Pressure switch for applications involving excess pressure.

GW...A4 HP

The pressure counteracts the force of the setting spring on the micro-switch via the metal bellows. The pressure switch does not require power assistance.

Pressure switch GW...A4 HP

The switching mechanism reacts to overpressure and closes, opens or switches over a current circuit when the **specified pressure setpoint is overshoot** or undershot.

All gas-carrying parts are made of 1.4541 stainless steel and, therefore, are suitable for:

- applications involving operating pressures greater than 600mbar
- aggressive media such as sulphuric acid up to a concentration of 1.0 % by vol., humid
- **fluids (on request)**

Switching function

As pressure rises:

1 NC opens, 2 NO closes.

As pressure falls:

1 NC closes, 2 NO opens.

Definition of switching difference Δp

The switching difference Δp is the pressure difference between the upper and lower switching pressures.

Degree of protection IP 54

- IP 54**
 - 5 Protection against ingress of solid particles $\phi \geq 1$ mm**
 - Protection against access to hazardous parts with a wire, $\phi \geq 1$ mm**
 - Complete contact protection
 - 4 Protection against a water jet.**
 - No hazardous conditions may result.

GW...A4, Design: Metal housing

Degree of protection IP 65

- IP 65**
 - 6 Protection against the entry of dust (dust sealed).**
 - Protection against access to hazardous parts with a wire, $\phi \geq 1$ mm**
 - Complete contact protection
 - 5 Protection against a water jet from a nozzle directed at the unit (housing) from any directions**
 - No hazardous conditions may result (water jet).

Electrical connection	Standard	at screw terminals via cable gland, M20x1.5			
	Special version	plug connection for line sockets as per DIN EN 175 301-803, 3-pin with protection contact			
Degree of protection	GW...A4 HP	IP 54 to IEC 529 (EN 60529), (clear hood)			
	GW...A4/2 HP	IP 65 to IEC 529 (EN 60529), (metal housing)			
Adjustment	With rising pressure and installed in a vertical position. Optional rising or dropping pressure adjustment on-site possible. Note switch point change if installation position changes..				
Setting tolerance	±15% switch point deviation based on the setpoint and with unit installed in a vertical position

Installation position

Standard installation position; if a different installation position is used,

pay attention to the changed operating points: **GW**

500 A4 HP ca. ± 10 mbar

GW 2000 A4 HP ca. ± 20 mbar

6000 A4 HP ca. ± 80 mbar

When installed horizontally, the pressure switch switches at a pressure higher

When installed horizontally overhead, the pressure switch switches at a pressure lowe

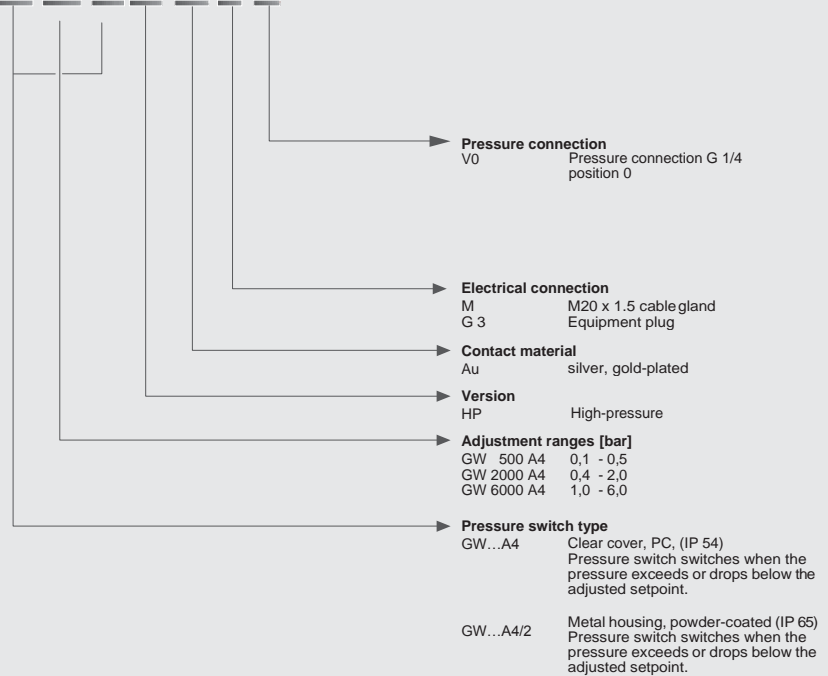

When installed at an intermediate position, the pressure switch responds if there is maximum upper or lower pressure deviation w.r.t. the set pressure reference value.
